PROJECTS

- HabitNest | HTML, CSS, JavaScript, Django, MySQL**
HabitNest offers a user-friendly platform for healthy habit development, featuring secure user authentication and personalized profiles.Users can effortlessly add and delete habits, track streaks, and earn achievements, while automated task generation simplifies habit management. Comprehensive analytics and visualizations provide insights into behavior patterns, helping users stay motivated and on track towards their goals.
- HomelyHub | MERN (MongoDB, Express, React, Node)**
HomelyHub is a MERN stack-based platform replicating Airbnb's core features. It offers user signup/login, property search by location, dates, pricing, and amenities, detailed accommodation info, property listings for owners, a booking system for date selection and reservation, and secure payment integration for transactions.
- ProHealth | HTML, CSS, MySQL**
Designed and implemented a HealthCare Management System named ProHealth Hospital to streamline patient registration, scheduling, and CRUD processes, resulting in reduction in administrator's time and a significant improvement in patient satisfaction.
- College Search Engine | HTML, CSS, Javascript, PostgreSQL**
Developed a user-friendly college search portal which provides students in India with a centralized platform to search and discover colleges, universities, and detailed course information, along with contact details.
